Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/674,637	Applicant(s) AWASTHI ET AL.	
	Examiner Joy K. Contee	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 December 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Response to Arguments

1. Applicant's arguments with respect to claims 1-18 have been considered but are not persuasive. Applicant argues that Anupam et al. (US 2005/0048981) teaches away from the instant invention. Examiner disagrees. Anupam disclose a wireless reconnect application (or WRA) that runs on an application server or a wireless reconnect media server (WRMS), see Fig. 1 and page 2 [0010]. Anupam goes so far as to teach that the Application server 111 and the WRMS can be located anywhere in the network and that the WRMS can reside on the same server as the application server, hence the server where the WRA resides (all described in page 2 [0010]). Examiner reads from Anupam that its claimed WRA which is inherently software running on either the application server and/or the WRMS to anticipate the Applicant's claimed "monitoring by the server", since the WRA runs on whichever server (Examiner interprets using the dictionary meaning of server to read on a computer which is connected to a network for accessing files or the like).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Anupam et al. (Anupam), U.S. Patent Pub. No. 2005/0048981.

Regarding claims 1-18, Anupam discloses a method for reconnecting a dropped telephone connection between a calling party and a called party, said telephone connection having been established by a telephone call having been initially placed by the calling party to a primary number of the called party and subsequently rerouted by a telephony server to an auxiliary number assigned to the called party, thereby establishing an inbound call from the calling party to the server and an outbound call from the server to the called party, said method comprising the steps of: monitoring the status of the inbound call by the server; monitoring the status of the outbound call by the server; detecting by the server the situation where the status of the inbound call is active and the status of the outbound call is dropped; and, attempting by the server to reestablish the telephone connection with the called party should said situation exceed a predetermined period of time (see pages 1-3, [0008-0020].)

Conclusion

4. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2617

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K Contee whose telephone number is 571.272.7876. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.
